Discover how collaboration can drive your desired business outcomes with these Limelight Collaboration solutions.

Limelight Collaboration Solutions

Conferencing and Messaging

Video and web conferencing infrastructure enables employees to present, share, and collaborate in real time anywhere, on any device.

Collaboration Endpoints

We use video, IP phones, web, mobile and desktop clients to streamline communications and enhance the user experience.

Workspaces

Physical space design and collaboration technology converge. **Virtual rooms and smart boards** bring dispersed teams together to speed decision making.

Contact Center

Improve your customer journey with Contact Center technology that helps you provide **contextual, continuous, and high-capability experiences** to your customers, while gaining valuable insights for your business.
