

TBL LIMELIGHT DATA CENTER

Enhanced application performance

Flexibility and scalability

Reliable disaster recovery and archiving

Why Limelight Data Center

Agility is the hallmark of today's successful data center. TBL **Limelight Data Center** is built for rapid application deployment and supported by a highly elastic infrastructure. You can choose for it to reside on your premises or off-site. Either way, it's completely managed by TBL and services your business exclusively.

Limelight Data Center Solutions

Compute | Storage Resources

Application Performance

Servers and networks are getting faster, but often disk drives and the storage systems built around them aren't keeping up. Limelight Data Center leverages high-performance, low-latency storage technology for enhanced application experience.

Data Growth and Retention

Gain elasticity to increase or decrease compute and storage resources to meet an ever-changing business climate and leverage archiving capabilities to meet retention requirements.

Disaster Recovery and Restoration

Improve application and data availability and recovery time with Limelight Data Center's automated disaster recovery and backup services.

...

“Application performance is the hot new requirement and storage is the bottleneck”
