

TBL LIMELIGHT SECURITY

Implementing effective cybersecurity measures is particularly challenging today because **there are more devices than people**, and attackers are becoming more innovative.

A successful cybersecurity approach has **multiple layers of protection** spread across networks, applications and endpoints.

Why Limelight Security

Today's cybersecurity experts use up to 50 vendors to protect their networks. Multiple vendors and multiple products lead to needless complexity. And to gaps in threat defense.

TBL **Limelight Security** solutions work together. They deliver effective network security and incident response. And they boost IT productivity through automation.

Our security innovations protect customers, employees, and brands by providing highly secure firewalls, web, and email services.

...

“Cyber crime is the greatest threat to every company in the world”

~ Ginni Rometty, IBM's chairman, president and CEO

Limelight Security Solutions

We have integrated a comprehensive portfolio of security technologies to provide advanced threat protection.

Our technologies include:

- Identity & Access Management
- Email Security
- Web Security
- End Point Protection
- Vulnerability Management
- Log Insights & Correlation
- Advanced Threat Analytics
- Encrypted Threat Analytics
- Patch Management
- DNS Protection

.....
All this is backed by in-depth threat and malware intelligence. Let us help you keep a step ahead of the latest cyber attacks.
