

SMART BOARD

Designed for the Way You Work

Help your team communicate clearly and create together in real time.
It's teamwork without interruption, just inspiration.

ALL-IN-ONE DEVICE FOR TEAM COLLABORATION

With **Smart Board** capabilities, you can wirelessly present, whiteboard, video or audio conference, and even annotate shared content. It has everything you need for team collaboration at the touch of a finger. Connect with virtual team members from anywhere, through the devices of their choice.

MEET. MESSAGE. CALL.

Bring ideas to life

Draw together and brainstorm. It's all saved to the same team workspace where you message and meet.

Meet instantly or schedule ahead

Talk it over wherever you are—from your smartphone, desk, room system, or the Smart Board. Move the meeting from your phone to your video-conferencing room with one swipe.

Keep talking. Keep projects moving

Always-on messaging means you're always up-to-date. Share files so your content lives within the conversation. Reach decisions faster and move forward.

Make the call

Call directly to any SIP-based endpoints to connect with someone, search contact lists, or dial in conference bridges to join a meeting. Enjoy high-quality audio or high-definition video calling directly on the Smart Board.

ALWAYS SECURE

End-to-end encryption

Only your authorized users have access to the server keys containing your encrypted data. And we're the only enterprise messaging service with end-to-end encryption.

Secure search

We've built secure search that keeps you protected while still making information findable. Searches are encrypted, keeping search terms and results from hackers, governments, or even us.

Lock and moderation controls

Keep teamwork private by locking spaces. Only moderators can add people to a space. Spaces with members who are outside your company are marked.

.....
Bring people together to create, communicate and collaborate in one continuous workstream before, during, and after the meeting.
