

## VIDEO

### Bringing Powerful Collaboration to All Your Meeting Rooms

Bring more intelligence and usability to your small to large-sized team collaboration rooms with **Video** features. They are rich in functionality and experience but are priced and designed to be easily scalable to all of your conference rooms.

#### TEAM COLLABORATION IN A BOX

**Video** capabilities offer video innovation in a box. This integrator solution delivers the unmatched video and audio experience. Its capabilities enable smarter meetings, smarter presentations, and smarter room and device integrations – further removing the barriers to usage and deployment of video collaboration.

The hardware is optimized to run on a cloud platform and offers great experiences for shared rooms and spaces, with easy access to hosted conferences.

#### INTEGRATED vs. SEPARATE SOLUTIONS

Integrate with flat panel displays to bring more intelligence and usability to your small to large-sized meeting rooms.

##### Smart meetings

Powerful, integrated cameras deliver intelligent viewing capabilities, such as automatic framing and speaker tracking; automatic noise suppression reduces meeting interruptions; see white board shared content and annotations and participate in white boarding sessions (cloud-registered end points only).

With a separate quad-camera bar, **Video** features can accommodate larger and deeper rooms of up to 14 people. It offer sophisticated camera technology that brings speaker-tracking capabilities to every room.

##### Smart presentations

Dual screens, dual content sources, wireless sharing, and 4K content make for great presentations.

##### Smart rooms

People count for usage metrics and resource allocation; tight integrations with screens to enhance user interactions.

##### Flexibility

Built for both on-premises and cloud deployment, protecting your investment.
